

The **Opticolour** factory as seen from the mezzanine floor — showing the computer controlled glass cutting table to the left, the computer controlled glass polishing machine in the centre, and at the back and to the right, the entrance to the glass splashback spray room and drying room.

Left: The computer controlled glass cutting table to the left, and to the right, the red glass storing racks for glass awaiting cutting.

Right: Storing racks for glass that has been cut and is awaiting toughening to ensure it doesn't crack after installation.

Left: **Opticolour** ventilated spray room showing various glass wall panels being sprayed with **Opticolour** lavender blue paint.

Right: Glass wall panels drying and other glass wall panels awaiting installation in glass racking.

Opticolour have been in the glass wall panel business many years and it is our only business. We have invested a lot of money in equipment, people and time to ensure that we do a proper job for our customers, which includes properly measuring the job, toughening all glass, and delivering a first class installation service.
